Multifunction System

Xerox® ColorQube™
9201 / 9202 / 9203
Multifunction System
Brilliant colour. Every day.
Every document.

Make everyday business more colourful (and colour truly affordable)

In the business world, nothing's really black and white. That's why you need colour – to clarify, to emphasise, to stand out. And now, for the first time, colour is priced right for any office. Bring your business to life with the Xerox ColorQube™ 9200 series multifunction system, and get dramatically lower colour printing costs for your workgroup. Print colour. Every day.

Only Xerox can deliver on the promise of affordable colour for every document, every day. Xerox has the patented solid ink technology to make it practical. Built from the start for high-performance office colour printing, our solid ink technology has a 19-year track record of reliability. Solid ink is simple to use, produces stunning colour print quality, produces less waste, and enables low cost colour for small businesses and global corporations alike. Give your business the full advantage of solid ink and get every Xerox innovation and advanced feature in one brilliant machine. Obviously, it's time to rethink your ink.

Great colour for a great price

Precision colour

Colours are vibrant, glossy and perfect for all office documents when the “right” colours are crucial.

- **Great looking documents regardless of media.** Count on dense, saturated colour even on inexpensive or environmentally preferred papers such as recycled paper.
- **Smooth colour blends and gradients.** Benefit from a wide colour range.
- **Exceptionally consistent colour.** Consistency is especially important on longer print runs.
- **Built-in PANTONE® spot-colour correction tables.** Get quick and easy PANTONE colour matching for true representations of important business colours – like your logo.

Powerful colour

The ColorQube 9200 series features a full range of colour-enhancing technologies, so the results meet your expectations.

- **Xerox Colour Correction technology.** Enhance printed output, adjust colour quality and save print settings to use again.
- **Adobe® PostScript® 3™, PCL® 5c and PCL® 6 support.** Even complex graphics print accurately.
- **Choose the perfect combination of image quality and print speed.** There are four different output settings: Photo, Enhanced, Standard and Fast Colour.

Breakthrough colour price

Add a little colour for a lot less. With the ColorQube 9200 series, you can make every document stand out. Without going over your budget.

- **Low colour page prices.** The ColorQube 9200 series is more cost-effective than comparable laser multifunction systems.
- **Unique price plans.** These are based on the actual colour used on the page. No more paying expensive full-colour page prices for small amounts of colour.
- **The more colour pages you print, the more you save.** Pages with useful amounts of colour are billed at the same rate as black and white pages. On most colour pages, your price will drop significantly.
- **Drive colour print costs lower.** Xerox Print Advisor helps educate users to make more cost effective printing decisions and provide administrators with insight on savings and optimising the print environment.

Ease of use that enhances your business every day

Speed up, simplify and work smarter

Unique solid ink features maximise convenience and efficiency.

- **Xerox solid ink sticks are cartridge-free.** Engineered for maximum ease of use, each solid ink colour is uniquely shaped for easy drop-in loading, and ink can be topped off at any time – no downtime to reload.
- **Increase print productivity.** Get speeds up to 85 ppm in Fast Colour mode for internal use or short life documents.
- **Copy speeds up to 50 ppm.** Keep up with your busy everyday workload.
- **Long-term print capacities.** The ColorQube 9200 series holds enough solid ink to print over 55,500 pages before replenishing.
- **Embedded help videos.** Get quick troubleshooting assistance right at the front panel, while the illuminated paper path makes occasional access less intimidating.
- **Solid ink has just one customer-replaceable unit.** With just a long-life Cleaning Unit to replace, you'll never have to worry about fusers or multiple imaging units typically found in laser devices.

- **No printing bottlenecks.** The Print Around feature holds a job needing resources (such as a different page size) and prints the next job in the queue.

A better way to manage your documents

Organise, archive and share documents with ease, thanks to advanced scanning and faxing.

- **Optimised file compression.** Scanned files are the smallest possible size for fast delivery and reduced network load.
- **Scan to Email.** Route files to email recipients directly from the front panel.
- **Network scanning.** Convenient templates let you send scans to predefined locations such as your personal network folder or document management system.
- **Scan to Mailbox.** Send electronic files to the device's hard drive for easy retrieval.
- **Text-searchable PDFs.** Convert paper documents to text-searchable PDFs for easy archiving, organising and searching.

Each solid ink stick is uniquely shaped to fit the correct slot, making ink loading fast, easy and clean.

- **Full compatibility with other Xerox office solutions.** Add powerful Xerox SMARTsend® software for advanced document routing.
- **Powerful fax capabilities.** Send faxes from the desktop, over the Internet or via an existing fax server.

Tailored to fit your document needs

Xerox Extensible Interface Platform® enables personalised and simplified workflows that meet your unique business requirements. Using standard web development tools, in-house developers can build tailored server-based applications that users can access right from the touch screen. Extensible Interface Platform applications can leverage your existing databases and systems, providing a greater return on investment. Software solutions from Equitrac, Nuance and other third parties provide advanced print management, cost recovery, faxing and scanning capabilities. To learn more, visit www.xerox.com/eipinfo.

Goodbye: toner cartridges and wasteful packaging Hello: greener world

While enhancing your company's image with colour, let the ColorQube 9200 series put you on the path to a greener workplace.

- **Cartridge-free solid ink sticks.** Avoiding the excessive packaging of toner cartridges means fewer resources are used and less energy is invested in manufacturing and transportation. The results? 90 per cent less waste in your office and a smaller carbon footprint across the product life cycle*.
- **Think globally. Act locally.** Solid ink packaging is made from post-consumer waste that can be recycled locally where options are available.
- **There's only one customer replaceable component.** The long-life Cleaning Unit with an average yield of 200,000 prints can be recycled through the Xerox Green World Alliance programme (visit www.xerox.com/gwa for more information).
- **Energy Star® qualified.** Has earned the 2009 Energy Star® for reduced power consumption.

- **Print responsibly.** Get brilliant colour on recycled papers plus standard two-sided printing and copying. Or, go paperless with powerful scanning features to manage documents electronically.
- **Intelligent Ready technology.** It learns your workgroup's usage patterns and moves to low power mode when you're less likely to need it.
- **No-mess solid ink is non-toxic.** It's also safe for anyone to handle and won't stain clothes, skin or furniture.
- **Xerox has a longstanding focus on green innovation.** Xerox offers environmentally responsible choices for paper and media such as recycled media with up to 100% post-consumer recycled content and paper that adheres to internationally recognised standards for sustainable forestry management. We've also diverted over 2 billion pounds of waste from landfills through our Product Take-back and Recycling Programme (visit www.xerox.com/environment to learn more).

* Based on a Xerox-conducted and peer-reviewed lifecycle assessment comparing a solid ink device to a comparable colour laser device.

Solid ink waste vs. laser waste

Cartridge-free solid ink is a true consumable; no empty toner cartridges to dispose or recycle.

The ColorQube™ 9200 series produces 90 per cent less waste during use than a comparable laser device.

Solid Ink
40 kgs

Laser
370 kgs

Total waste produced from printing 22,000 pages per month for 4 years.

Intuitive, intelligent, advanced Xerox features

Designed with IT in mind

IT departments will love the ColorQube 9200 series for its innovative features and software that reduce downtime and IT support costs.

- **Reduce calls to the IT desk.** Features such as simple ink loading, a long-life CRU, embedded help videos and an illuminated paper path minimise interventions.
- **Manage every device.** Using Xerox CentreWare® Web, IT administrators can easily install, configure, manage, monitor and report on printers and multifunction devices across the network, regardless of manufacturer.
- **Access the ColorQube 9200 series remotely.** Xerox CentreWare® Internet Services, a web server built into the device, simplifies installation, cloning and network administration, and provides quick access to device and job status, accounting information and online support.
- **Simplify print driver management.** The Xerox Global Print Driver® and Mobile Express Driver™ eliminate the need for IT and users who work in multiple locations to download individual print drivers for each product. These drivers are truly universal and let users print to most devices – even those made by other manufacturers.
- **Easy, accurate billing.** Smart eSolutions MeterAssistant® collects and automatically submits meter reads to save employees' time.
- **Multitasking operation.** Multiple users can perform different tasks simultaneously – scan, copy, print, fax and manage the queue – to maximise business efficiency.

Safeguard your information with advanced security features

Now you can minimise security risks without adding extra time and work.

- **State-of-the-art security standards.** The ColorQube 9200 series conforms to the latest industry standards for network security, supporting IPSec to encrypt document content, SNMPv3 to securely transfer information to users, and 802.1x to securely authenticate network devices before allowing document access. Plus, the device has been submitted for full system Common Criteria (ISO 15408) certification.
- **IPv6.** The next-generation Internet addressing protocol improves security, routing and auto-configuration on your network.
- **Secure Access Unified ID System.** This optional feature enables users to log into the device with a swipe of their existing security badge.
- **Image Overwrite.** Scanned documents are completely erased from your device, preventing unauthorised printing of sensitive material.

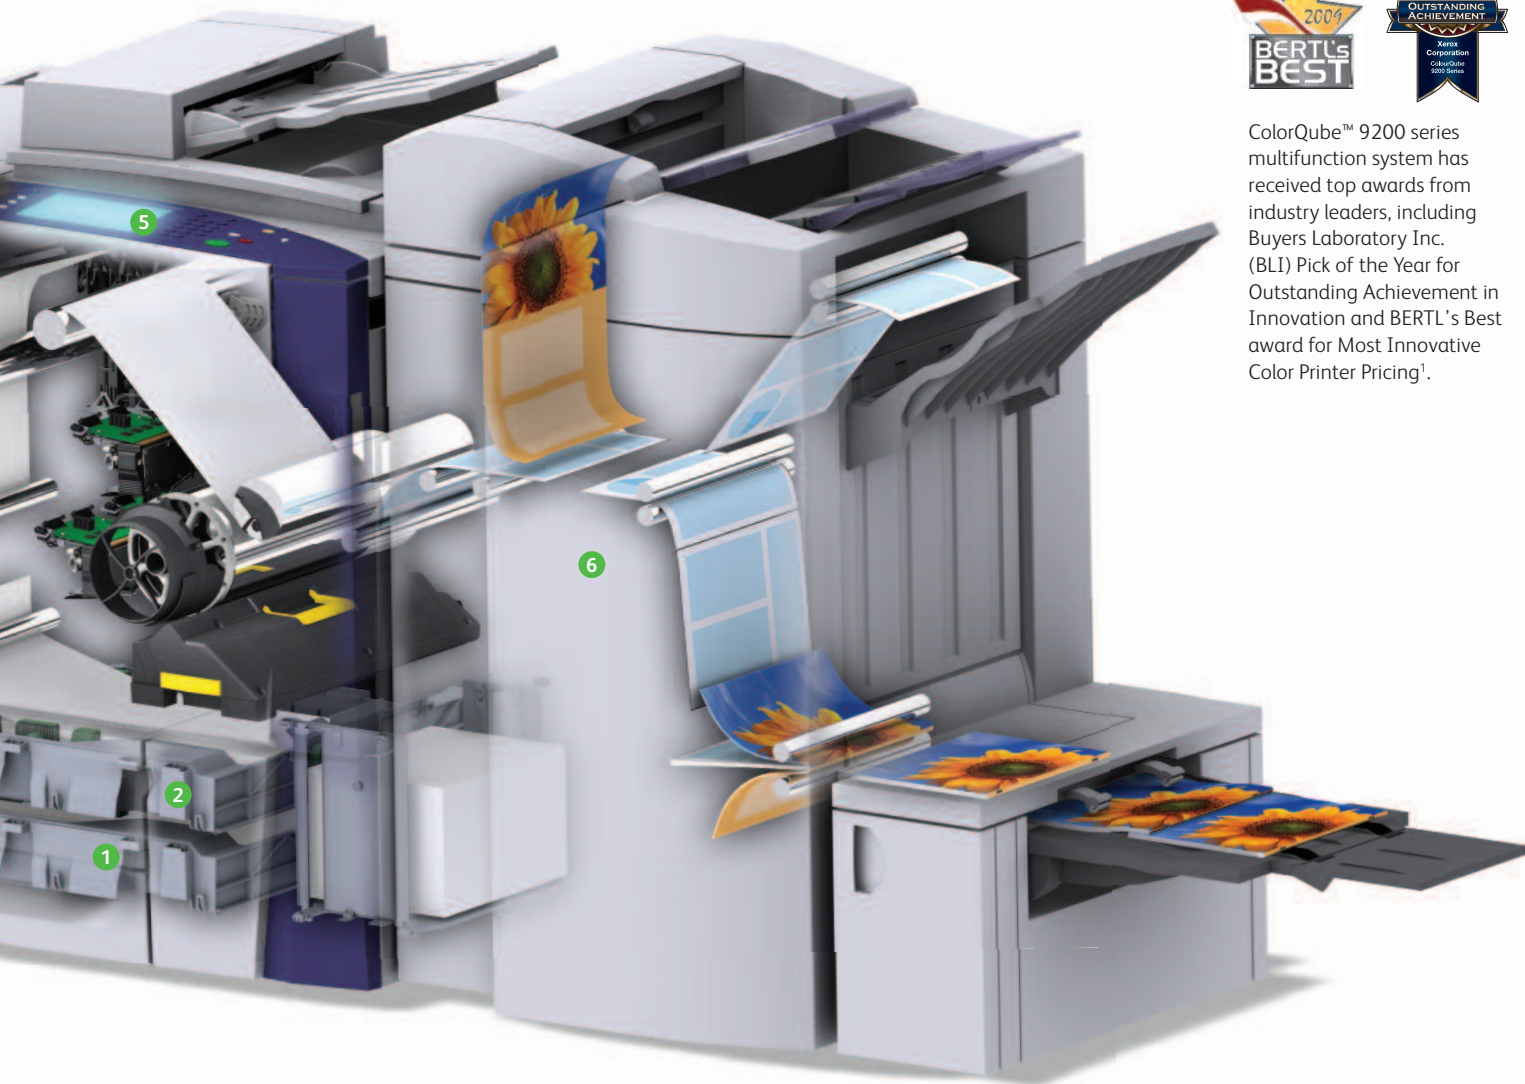

- 1 Two 550-sheet universal-size trays hold paper sizes up to A3.
- 2 Tray 3 holds a total of 2,100 sheets of A4 paper.
- 3 100-sheet Bypass Tray handles media sizes up to SRA3 and weights up to 220 gsm.
- 4 For high-volume workgroups you can add a 4,000-sheet A4 High Capacity Feeder and a 2,000-sheet Short-Edge Kit in either A4 or oversize for A3 media.
- 5 Embedded help videos offer users clear directions for quick troubleshooting assistance right at the touch screen.
- 6 Three optional finishers. Choose basic features such as staple and hole punch, or advanced capabilities to produce paginated, saddle-stitched and folded booklets and Z- and C-folded brochures.

ColorQube™ 9200 series multifunction system has received top awards from industry leaders, including Buyers Laboratory Inc. (BLI) Pick of the Year for Outstanding Achievement in Innovation and BERTL's Best award for Most Innovative Color Printer Pricing¹.

ColorQube™ 9201/9202/9203 Quick Facts
