

Xerox Scan to Searchable PDF

Boost productivity in one easy step

Xerox is making scanned PDF files better than ever. With new Scan to Searchable PDF functionality, Xerox lets users effortlessly create fully searchable PDF files in one easy step.

Now, creating a text searchable PDF file is as easy as choosing a file format when programming a scan job – it can even be designated the default format. No separate servers or software to purchase and manage, no additional buttons or steps for users, your Xerox multifunction system automatically handles the process so you don't have to.

The full integration of Scan to Searchable PDF means these documents can be sent to any scan destination available to the multifunction system. Whether your workflow processes involve scanning to email, network or server locations, local or network computers, or document management systems, you'll be able to utilise searchable PDFs immediately.

Scanning is easy – now finding what you scanned is just as simple.

Searchable PDF files are as interoperable and secure as regular PDFs, but with content that can be indexed by search engines – making it easier than ever to search for and find files on your network.

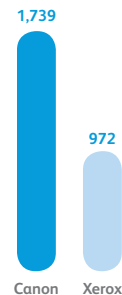

Archiving hard copy documents digitally has become a requirement in a variety of industries and departments. These include archiving records in government, student records in education, client and case files in legal, patient records in healthcare, or employee records in general business environments, to name a few.

Whether you work in a small office or a large enterprise, Xerox Scan to Searchable PDF can simplify work processes and improve productivity. With Xerox this process is easier, and more accurate, than ever.

While most vendors have not yet provided scan to text searchable PDF capability in their products, Xerox is making it available in the scan kit at no extra cost. Even better, Xerox multifunction systems offer the most accurate solution available, providing 79% more accurate OCR than similar devices from Canon as tested by Industry Analysts.

Xerox multifunction systems are almost twice as accurate in recognising words.

Average word errors per device out of 13,640 words

A Comparative Analysis of Embedded OCR Accuracy of Selected Xerox and Canon multifunction systems

Performed by: Industry Analysts, Inc. December 6, 2007
