

Xerox® Integrated RFID Card Reader E1.0

Making Security Simple and Built-In

Access to the power of your company's multifunction printer (MFP) equipment is critical. Xerox can help you keep it under control.

Introducing Xerox® Integrated Radio-frequency Identification (RFID) Readers

IT managers are looking for effective ways to track copying and printing on their MFP devices. In today's regulatory climate, businesses need sophisticated ways of safeguarding their data.

Xerox has developed a convenient, streamlined method of identifying users at the multifunction printer using RFID technology. Users can gain access to the device with one swipe of their ID badge.

How It Works

The Xerox® Integrated RFID Reader works within your existing employee/student ID RFID badge solution.

When combined with print management software, you can configure access to specific MFP functions, establish user-specific rules and configure user-specific pricing.

- Installs under the MFP cover
- USB connection hidden from users
- Programmed to support over 30 RFID technologies simultaneously
- Compatible with all authentication/accounting systems that support USB keyboard emulation interface

General industry card brands supported by the Xerox® Integrated RFID Card Reader E1.0:

- HID Prox® Family
- HID® iClass®
- HID Indala
- HITAG®
- MIFARE Classic®
- MIFARE® DESFire®
- Casi-Rusco®
- EM Microelectronic
- Kantech ioProx
