Drivve
Drivve | Image

drivve | image

Drivve | Image is a user-friendly set of feature-rich, customisable tools for capturing, processing and distributing document images. It covers a broad spectrum of a small or mid sized business's imaging and workflow needs by bringing comprehensive functionality, deep integration capabilities, and exceptional ease of use right to the control panel of any Xerox EIP-enabled multifunction printer.

Drivve | Image Key Features

Scanner Power Tools Automate distributed capture with customised workflows and multiple image-processing powers; intelligent file-name generation; file format conversion.

Create fully automated and flexible scan profiles; browse network folders at the multifunction printer; blank-page deletion/separation; Bates stamping; image correction/enhancement.

Database Connector Exchange information with an existing database using SQL; brings LDAP/ODBC connectivity to your MFP; offers email integration.

Exchange | Fax Connector Deep integration with Microsoft Exchange Server and selected fax server software.

Barcode Module 1D and 2D bar code recognition and document separation via bar codes.

OCR Module Create readable and searchable PDF, PDF/A documents encrypted to ensure confidentiality; create editable Microsoft Office documents; autorotate documents.

SnapForm® Pilot Create, process and distribute a variety of standardised eForms right at the multifunction printer display.

Coversheet Module Generate coversheets that automate your scanning workflow according to bar code data.

SharePoint® Connector Complete integration with your existing SharePoint Services system from the multifunction printer panel.

Benefits

Drivve | DM allows information scanned into a Xerox office multifunction printer (MFP) to be accessed at any time through all major browsers.

Drivve | DM provides full distribution of information — from any Xerox multifunction printer into the central web based interface through to the native iPhone application.

Drivve | DM provides tools for complete integration with an information infrastructure, with links to existing resources such as merchandise information systems, CRM and ERP systems, etc.

By bringing together feature-rich, customizable modules that are exceptionally user-friendly, Drivve | Image turns any Xerox EIP-enabled MFP into an exceptionally integrative workflow engine. In fact, Drivve | Image transforms an entire network of Xerox MFPs into a responsive, finely tuned, programmable ignition system for these workflows.

- Globalization – Drivve | Image distributes your documents wherever you want in seconds – to a database, network folder, email or fax address
- Electronic communication – Drivve | Image optimizes your document capture, processing and distribution in full security
- Too much data – Use Drivve | Image to manage any information overload by indexing documents as you see fit right at the Xerox MFP display and then filing them readable, searchable and editable PDFs
- Strict privacy laws – Drivve | Image rights assignment provides absolute control over document access
- Lots of paper – Speed document capture, processing and distribution by using Drivve | Image to set complex and multiple workflows into action with the touch of a single button
- Less money – Drivve | Image's affordability is another reason it's your go-to accompaniment
- Less time – Drivve | Image accelerates, streamlines and automates workflows, optimizing an organization's unique imaging needs and eliminating time-consuming manual processes from daily office tasks.

Specifications

Systems requirements:

- Server 2003 all editions, 32 bit (64 bit only on dedicated Drivve | Image PC)
- Server 2008 all editions, 32 and 64 bit
- Windows 7, 32 and 64 bit, all editions except Home Edition
- XP Professional 32 and 64 bit
- Internet Information Server with enabled WWW services
- Microsoft .NET 3.5 Framework SP1
- Available storage space: at least 300 MB
- TCP/IP network protocol
- Internet connection (for software registration)

Xerox products supported:

- All EIP enabled devices including ColorQube™ models
