

# PrintShop Mail Promotional Personalization Printing Software

## Promotional personalized printing made easy!

PrintShop Mail is a software solution that allows users to create dynamic, database-driven documents quickly and easily. PrintShop Mail allows you to personalize your promotional communications by varying text, graphics, barcodes, or entire layouts based on information found in your database.

PrintShop Mail allows you to create fully one-to-one messages which can dramatically improve response rates and associated sales when they are relevant to the recipient. Use PrintShop Mail to personalize the look and content of your promotional documents such as advertisements, direct mailing, flyers or any other type of promotional documents and achieve:

### Business Applications:

- Direct Mailings
- Newsletters
- Postcards
- Certificates
- Brochures
- Business Cards
- And so much more!

**Faster time to market**

**Higher response rates**

**Better customer service**

**Reduced costs while efficiently targeting your customers**

**More ways to generate revenue**

**Higher productivity**

**More accurate and up to date information**

## PrintShop Mail makes personalized printing quick and easy!

Any design	Any database	All major RIP technologies
Adobe Illustrator® Adobe InDesign® Adobe PageMaker® Corel® MS Word® QuarkXPress® Etc.	Dbase (.dbf) Delimited ASCII (.txt, .csv) MS FoxPro (.dbf) MS Excel (.xls) MS Access (.mdb) ODBC Support (SQL, etc.) Paradox (.db) XML	Optimized PostScript® Standard PostScript® Creo™ VPS Fiery FreeForm™ I & II PPML PPML/VDX Xerox VIPP™
Create dynamic, database driven documents using an intuitive, drag-and-drop interface. No programming required.	Insert your database field names onto the document layout, add variable text, barcodes, images and or create graphics and choose from a selection of expressions or create new ones yourself.	The document and its link to the database are sent to the printer only once. While printing, the variable data is merged on the fly. This greatly shortens the printing process and decreases your network congestion. PrintShop Mail includes specific print and finishing commands to streamline your print production process.

## Personalization printing benefits

- Personalized, relevant messages in your print communications increase readers' interests, retention and learning of facts.
- Compared to traditional mass mailings, personalized mailings will multiply response rates and revenue.
- Create a long-term relationship with your clients and increase customer loyalty by personalizing your communications.
- Leverage the real potential of your data by printing variable images and text based upon unique information on each individual recipient.

## PrintShop Mail benefits

- **Easy to learn** - Create personalized print jobs immediately.
- **No programming** - The drag-and-drop operation is easy for beginners and professionals and saves you time and money.
- **Application independence** - Use existing design and database applications.
- **No network congestion** - The optimization of PostScript yields an efficient print production stream.
- **Open architecture** - Integrates easily into your existing workflow.
- **Finishing support** - Support for embedded finishing commands to streamline the entire production process.

## PrintShop Mail features

- Free designer software
- User Interface adjustable to your needs
- Choose from a selection of expressions or create new ones yourself
- Save your templates for repetitive print jobs
